PROJECTS

Megapixel (A online photography school)

[Server Site Github](#) | [Client Site Github](#) | [Live Website](#)

Technology used: React JS, Firebase Authentication, Node JS, Express JS, MongoDB, JWT

- It's an online school where users can enrol courses via stripe payment method.
- Admin, Instructor and Students have their own dashboard. JWT implemented.
- Website is fully responsive.

Super Toys (Action toy store)

[Server Site Github](#) | [Client Site Github](#) | [Live Website](#)

Technology used: React JS, TailwindCSS, DaisyUI, Firebase Authentication, Node JS, Express JS, MongoDB

- This website based on Action Toys here user can see popular action toys information.
- Google and Email authentication added. User can add toys and also can delete and update. Dynamically added toys will show in the tab section by category.
- Website is responsive for mobile, laptop and desktop. Smooth scroll animation added.

Dream Food (A food recipe website)

[Server Site Github](#) | [Client Site Github](#) | [Live Website](#)

Technology used: React JS, TailwindCSS, DaisyUI, Firebase Authentication, Node JS, Express JS

- This website is based on food recipes of America. Here you will get the best chef of all time in America, their bio, and some recipe.
- 'View Recipe' is a private route, the user needs to log in to see the recipe. Google and Github login method added.
- Website is responsive for mobile, laptop and desktop.
